

STRAVYX

Australia's On-Demand Drone Services Network

Executive Summary

Web MVP 19 June 2026 | Master Business Summary aligned

Stravyx Pty Ltd | ACN 696 964 271 | stravyx.com | CONFIDENTIAL | May 2026

Source: Stravyx Founder's Mission Statement / Master Business Summary (April 2026). Working document - single source of truth for commercial model.

1. What Stravyx Is

Stravyx is an AI-powered two-sided marketplace for commercial drone services in Australia. Asset-light in the mobile operator model - Stravyx does not own or operate customer-facing drones for mobile missions. Long-term vision: autonomous network via DJI Dock 2/3 infrastructure.

Strategic reframe: Stravyx ReOC unlocks 100,000+ RPL pilots (30x vs ~3,000 ReOC operators). Stravyx becomes operator of record for dock missions; mobile operators remain independent (own ReOC).

2. Two-Layer Revenue Model

Layer	Description	Split
Layer 1 - Flight fee	Onsite mins x rate x equipment factor. Base \$250/hr.	Operator 85% / Stravyx 15%
Layer 2 - Processing	AI deliverable after raw upload. Independent of flight.	100% Stravyx
Customer sees	Stravyx Network Price only	~40% blended Stravyx revenue

Information architecture (five visibility layers)

- Customer: Network Price only.
- Mobile operator (own ReOC): flight fee + 85% share - never customer total or processing fee.
- Stravyx pilot (dock): offered mission price only - contractor under Stravyx ReOC.
- Dock owner: fixed per-flight fee only.
- Layer 2 begins after raw upload - never visible to operator, pilot, or dock owner.

3. Seven User Types

Type	MVP 19 Jun
Consumer / SME	Web booking - live
Enterprise direct / reseller	Post-MVP (Phase 1 programme)
Mobile operator (own ReOC)	Bid within Price Guide - live
Stravyx pilot (RPL, dock)	Post-MVP - requires ReOC
Public dock owner	Post-MVP
Private enterprise dock customer	Post-MVP
Platform admin	Verification, ops - live

4. Supply-Side Models

	Mobile operator	Stravyx pilot (dock)
--	-----------------	----------------------

Licence	Own RePL + ReOC	RePL under Stravix ReOC
Equipment	BYO drone	Dock-based Stravix drone
Travel	To job site	Remote supervision
MVP	Responsive web portal	Not at launch

ReOC strategy: parallel track - own ReOC application (HAO required) + short-term ReOC partner for dock ops until Stravix certificate granted.

5. Mission Flow & Catalogue

Mission Service owns lifecycle from customer intent through raw delivery, Layer 2 processing, and closure. Matching runs BEST MATCH SCORE on operator bids within the Price Guide.

Lifecycle

- DRAFT -> SUBMITTED: requirements locked; Network Price or bidding begins.
- QUOTING (Standard/Scheduled): mobile operators bid within Price Guide; BEST MATCH SCORE ranks.
- DISPATCHING (Immediate/Urgent): broadcast brief; auto or accept.
- CONFIRMED: winner selected; payment authorised; full address revealed.
- READY -> AIRBORNE -> COMPLETE: compliance gate before Airborne.
- Raw data uploaded by operator; Layer 2 processing job created (invisible to operator).
- IN_REVIEW -> CLOSED: customer receives processed output; 85/15 Layer 1 settlement.

Ten mission categories (full catalogue)

#	Category	MVP 19 Jun
1	Aerial photography / videography	Live
2	Property / building inspection	Live
3	Construction / site progress	Live
4	Event coverage	Live
5	Security / surveillance	Live
6-10	Survey, agriculture, infrastructure, 3D twin, delivery, custom	Post-GA

Urgency tiers (Network Price multipliers)

Tier	Multiplier	Dispatch
Immediate	2.0-2.5x	Seconds / auto-dispatch
Urgent	1.25-1.5x	30-60 minutes
Standard	1.0x base	24-48 hours
Scheduled	0.85-0.90x	Pre-booked

6. BEST MATCH SCORE & Bidding

Working name for ranking algorithm (replaces earlier FLIGHT SCORE). Customer-centric: finds best result, not cheapest bid alone.

- Operators bid within Price Guide floor and ceiling.
- Factors: price competitiveness, quality track record, capability match, proximity.
- Dock nodes (future): structural proximity advantage within coverage radius.

7. Stravix Finance & DJI

- Stravix Finance: white-label via 4K Group - dock hardware finance (~\$30k installed, TBC).
- DJI Phase 1: Pilot-to-Cloud (mobile operators); Dock-to-Cloud (enterprise docks).
- DJI outreach gate: live professional website + commercial one-pager before partnership meeting.
- Global: DJI Cloud API can dispatch docks internationally from MVP - AU primary revenue.

8. Design & Technology

Figma (not Google Labs Stitch) for production UI. NestJS modular monolith for MVP.

Technology choices

Layer	Technology	Rationale
Web	Next.js 14+	Consumer + mobile operator + admin - GA 19 Jun 2026.
Mobile apps	React Native - later	Phase 1 programme post-GA.
Design	Figma	Seven personas; visibility-aware flows.
Pricing	In-platform engine	Network Price, Price Guide, urgency, equipment factors.
Matching	BEST MATCH SCORE v1	Bid ranking; dispatch rules by tier.
Payments	Stripe Connect	85/15 Layer 1 split; hold until review.
Processing	Layer 2 queue	AI pipeline post-raw upload (stub OK at GA).
DJI	Cloud API	Pilot 2 sync; manual path at MVP.
Data	Postgres+PostGIS, S3	AWS ap-southeast-2.
Finance	4K Group white-label	Parallel commercial - Stravix Finance.

9. Phased Roadmap

Phase	Period	Milestones
MVP (web)	19 Jun 2026	Network Price, bidding, BEST MATCH SCORE, 85/15, raw+processed portal, live site
Phase 1	2026-2027	ReOC, RPL pool, Finance live, docks, CASA, DJI partner, MSDK app, patrol blocks
Phase 2	2028+	Autonomous dock network, multi-flight supervision, Series A scale

- Investment: AUD 1.5-2.5M; 10-12 FTE (full plan). Smaller teams: reduced scope per cut lines.

10. MVP Build Timeline (19 June 2026)

25 working days: 26 May - 19 Jun 2026. Web only: consumer, mobile operator (own ReOC), admin. Figma handoff to engineering. Goal: prove Network Price, Price Guide bidding, BEST MATCH SCORE, 85/15 Layer 1, raw upload, Layer 2 processing handoff, live marketing site + one-pager.

Milestones

Gate	Date	Criterion
M0	26 May	Visibility matrix; founder model locked
M1	1 Jun	Network Price -> bid -> confirm (staging)
M2	8 Jun	Pay; operator wins; raw upload
M3	12 Jun	85/15 split; Layer 2 in portal
M4	14 Jun	Feature freeze
M5	16 Jun	RC; marketing site live
M6 GA	19 Jun	Public booking; Sydney + Melbourne metro

P0 scope (summary)

- Consumer: wizard, Network Price, Stripe, tracker, processed deliverables.
- Mobile operator: verification, Price Guide bid, status, raw upload, 85% view.
- Admin: verification, disputes, audit CSV.
- Five mission categories at launch; five deferred post-GA.
- Out: dock pilot portals, enterprise API, native apps, full Layer 2 AI at GA.

Week-by-week

Week	Dates	Focus
1	26 May-1 Jun	Pricing, visibility, auth, M1
2	2-8 Jun	Stripe 85/15, bidding UI, upload, M2
3	9-15 Jun	Admin, one-pager, UAT, M3/M4 freeze
4	16-19 Jun	RC, soft launch, M6 GA

Critical path and cut lines

Pricing -> Visibility -> BEST MATCH SCORE + bidding -> Stripe 85/15 -> Raw upload -> Layer 2 -> Marketing site -> GA.
Cut lines: 3 categories; price-only rank; GA slip to 26 Jun.

Definition of done (GA)

1. Customer pays Network Price.
2. Operator bids; BEST MATCH SCORE selects winner; 85% payout view only.
3. Processed deliverable in portal; Layer 2 hidden from operator.
4. Marketing site live; one-pager for DJI.

Full detail: docs/mvp-build-timeline.md and stravix-mvp-build-timeline.pdf

11. Risks & Board Ask

Risk	Mitigation
ReOC delay	Mobile-only MVP; short-term partner

Two-layer complexity	API visibility matrix; manual processing SLA at GA
DJI premature outreach	Website + one-pager first
Supply cold start	Founding Operator programme

1. Approve web MVP 19 Jun 2026 and Phase 1 budget (AUD 1.5-2.5M; 10-12 FTE).
2. Endorse ReOC strategy (HAO, parallel partner) and post-GA CASA engagement.
3. Support DJI introductions after credibility package is live.
